Election/Restrictions

1. Claims 1-29 are, drawn to a computer trading system, classified in class 705, subclass 35.
- II. Claims 30, drawn to a anonymous trading system, classified in class 395, subclass 25.
- III. Claims 31, drawn to an trading system , classified in class 705, subclass 37.

1. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects. For example the invention of group I has the effect of distributing deal information messages throughout the network, while the invention of group II has the effect of matching orders input into the system and for communicating price information. The invention of Group III also has different effects from the inventions or group I and/or group II in that the invention of group III including a plurality of nodes for matching anonymous bids and offers by counterparties.

2. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or II, restriction for examination purposes as indicated is proper.

Art Unit: 3624

3. This application contains claims directed to the following patentably distinct species of the claimed invention: ***.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, *** generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3624

4. Claim 1 is generic to a plurality of disclosed patentably distinct species comprising routing information, distribution patterns, and routing flags and deal related information. distribution patterns . Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of the routing information, distribution patterns, and routing flags and deal related information. distribution patterns, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
